

It s essential that all deaf people be allowed equal access to use the vsr in any manner given and not given limitations as what we shld have or ot have... We are human just like hearing people they have all kind of choices and pls do not limit ours just for the sake of whomever thinks what we shld need or not need. Sure we are a minority but it s time we got some better services compared to other minorities they are getting more than what we are able to receive... Open the doors to us pls is all that I ask for myself and a milion other vsr user or new vsr to come.. We do have tdd and sidekics espically to senior citizen deaf who want to communicate their fingers my not function with tdds or sidekicks very well and the use of vsr will help us senior deaf population to be able to communicate.. Pls do not deprive us a valuable tool for us or limit it to us, Thank u ... Sue J. Cameron , deaf user...
